### Chubby Chops come out early

FOLLOWING on from a big response and some fine captures on Barbel Chops, Quest Baits have released Chubby Chops earlier than intended.

The new bait is based around the chub's renowned love of cheese – something we saw recently with Pallatrax's new Cheese Feast Sticks.

Quest's Chubby Chops are very quickly digested, yellow and include a pleasant tasting cheese powder combined with a smelly cheese attractant. To compliment the kegel-shaped pellets there's paste, dip and glug.

Barbel are sure to go for these too, and prices start at £4.99 as a 'Try a Bit Before You Commit' policy from Quest. Visit [www.questbaits.com](http://www.questbaits.com) for details.
